tifaniyy

I am a fresh graduate with a Bachelor's degree in Informatics from Gunadarma University, with an interest in data processing and analysis. During my studies, I learnt and used Python and SQL to process and analyse data, utilising libraries such as Pandas and NumPy. I also have experience in creating data visualisations and applying machine learning algorithms, particularly K-Means clustering, through various academic and personal projects. I am keen to continue learning and developing my skills in the field of data, and to gain experience in applying these skills in the workplace.

## Experiences

---

### Visualisation of Provincial Minimum Wage Data in Indonesia for 1997–2026 Using a Web Based K-Means Algorithm - Jakarta, Indonesia

May 2026 - Aug 2026

#### Project

- Preprocessed and analyzed Provincial Minimum Wage (UMP) data in Indonesia covering 1997–2026.
- Implemented K-Means clustering using Scikit-learn to group provinces based on minimum wage characteristics.
- Created data visualizations using Pandas, Matplotlib, and GeoPandas to illustrate wage trends and clustering results.
- Developed a web based data visualization application using Flask to present analytical results through an interactive interface.
- Deployed the Flask application on Railway, making the project accessible online.

### E-commerce Thrift Shop (Oldmarketjkt) Website - Tangerang, Indonesia

Oct 2025 - Jan 2026

#### Software Designer

#### Project

- Served as a Software Designer for the Oldmarketjkt web based e-commerce project.
- Designed software requirements, system structure, and user interfaces to support application development.

### Dashboard to display UMP (Provincial Minimum Wage) data in Indonesia - Jakarta, Indonesia

Jun 2025 - Aug 2025

#### Project

- Performed data preprocessing and analysis of Indonesian Provincial Minimum Wage (UMP) data using Python and Pandas.
- Created line and bar chart visualizations using Matplotlib to analyze UMP trends across provinces from 1997–2025.
- Developed a web based dashboard using Streamlit to present data insights in an interactive and user friendly format.

### PT Telekomunikasi Indonesia (Persero) Tbk - Telkom Witel Jakarta Pusat, Indonesia

May 2025 - Aug 2025

#### Internship

- Network Technology Research: Reviewing and compiling analytical material on the potential application of Wi-Fi 7 technology in an enterprise environment.
- IoT Exploration: Studying the architecture of the Internet of Things (IoT) and the operation of the Antares platform.
- Website UI/UX Design: Designing the interface for an internal website, with a focus on the clarity of the information structure and ease of user navigation (usability).

### E-commerce (Online Shoes Store) website developed locally using PHP, SQL and Bootstrap - Jakarta, Indonesia

Dec 2024 - Jan 2025

#### Project

- Designed the website navigation structure to improve user flow and accessibility.
- Designed and implemented a responsive navigation bar using Bootstrap.
- Created wireframes to define the website layout and user interface structure.
- Built an interactive prototype to demonstrate user flows and interface interactions.

### Machine Learning-Based Classification of Hand Gestures: Rock, Paper, and Scissors - Jakarta, Indonesia

Sep 2024 - Oct 2024

#### Project

- Prepared and preprocessed hand gesture image data for machine learning classification.
- Trained a machine learning model to classify hand gestures into three categories: Rock, Paper, and Scissors.
- Performed model evaluation to assess classification performance and prediction accuracy.
- Developed a classification workflow for predicting hand gestures from input images.

## Educations

### Universitas Gunadarma - Jakarta

Sep 2022 - Aug 2026

Bachelor of Informatics, 3.86/4.00

- Actively involved in major student organizations, developing leadership and teamwork skills.
- Contributed to several application and website development projects.

## Organizational Experience

### Himpunan Mahasiswa Teknik Informatika Universitas Gunadarma - Depok, Indonesia

Sep 2023 - Jul 2024

Member of Public Relations

- Social media admin responsible for creating, uploading, and managing content posting schedules.
- Building interactions with the public
- Conveying the aspirations of the major community

### PEMIRA BEM FTI - Depok, Indonesia

Aug 2023 - Sep 2023

Head of Public Relations Division

- Developing a Communication Strategy
- Managing Media and Information

## Training, Skills, & Tools

- **Advanced Database Systems**  (2026): Relational Database Design to Mapping Relational, Advanced SQL, Data Integration, Monitoring Database.
- **Belajar Dasar Visualisasi Data by Dicoding**  (2025): Learning data visualisation, data preparation, and data storytelling using Google Sheets.
- **Memulai Pemrograman dengan Python by Dicoding**  (2024): Learning Python programming fundamentals, data handling, control flow, OOP, testing, coding standards, and popular Python libraries.
- **Data Formatting & Cleansing by MySkill**  (2024): Completed a Data Formatting & Cleansing Short Class covering data cleaning, formatting, transformation, and preparation for analysis using spreadsheets.
- **Belajar Dasar Pemrograman Web by Dicoding** (2024): Learning web development fundamentals, HTML, CSS, responsive design, and Flexbox for building modern websites.
- **Study Case Bootcamp Machine learning & AI for Beginner by DQLab**  (2024): Completed a Machine Learning & AI bootcamp covering fundamental concepts, data preparation, machine learning techniques, and practical AI applications.
- **Study Case Bootcamp Data Analyst with Excel by DQLab**  (2024): Completed a Data Analyst with Excel bootcamp covering data cleaning, analysis, visualization, and reporting using Microsoft Excel.
- **Belajar Dasar Structured Query Language (SQL) by Dicoding**  (2024): Learning data and database fundamentals, DBMS, SQL, database structures, and basic SQL queries for data manipulation and retrieval.
- **Study Case Bootcamp Data Analyst with SQL & Python by DQLab**  (2024): Completed a Data Analyst with SQL & Python bootcamp covering data analysis, SQL querying, Python programming, data processing, and visualization.
- **Hard Skills:** Data Analysis: Excel, SQL, Python, Pandas, Data Cleaning, Data Visualization  
Data Visualization: Matplotlib, GeoPandas  
Machine Learning: Scikit-learn, K-Means Clustering  
Web Development: Flask, HTML, CSS, Bootstrap  
Deployment: Railway, Streamlit  
Design: Figma, Canva, Blender  
Office: Microsoft Word, PowerPoint
- **Soft Skills:** Responsibility, Communicate, Team Work, Problem Solve, Discipline
